Compact Track Loader

JOHN DEERE

GET ON THE WINNING TRACK

When we asked owners and operators like you — the ones who run them — for your ideas on what makes a great compact track loader, you helped us redefine our proven G-Series models. You wanted more power under the hood. And increased lift height, reach, stability, and breakout force. Plus optional LED side lighting, rearview camera, anti-vibration undercarriage system, and flexible grade-control solutions including fully integrated SmartGrade™. Putting us through the paces has helped put the 333G on track for even more performance — and your operation in the running for some pretty big wins.

Armed forces

Extreme pushing power and bucket breakout forces deliver the tractive effort and leverage to carve out clay, plow through piles, and handle large loads.

Smooth operator

Optional anti-vibration undercarriage system* allows higher travel speeds over rough terrain with better material retention and lower operator fatigue. Bogie system enables smoother transitions over uneven surfaces.

*Only for zigzag-bar tracks; not compatible with SmartGrade or SmartGrade with Slope Control.

Put production on repeat

Optional electrohydraulic (EH) boom performance package shortens cycle times and speeds production in repetitive boom applications.

Load warrior

Height to hinge pin of 11 feet enables the 333G to easily load tandem-axle dump trucks, fill hoppers, and feed mixers. Additional reach comes in handy for moving pallets of pavers or other weighty cargo.

Take control your way

EH ISO-pattern joystick controls that allow customized machine operations based on operator preference come standard. EH four-way controls, including EH foot control, ISO joystick control, H-pattern joystick control, and ISO and foot controls, are optional.

GRADE IT EASY

WITH JOHN DEERE GRADE-CONTROL OPTIONS

- **Onboard grade-indication** provides a real-time readout of cross-slope (machine roll) and mainfall slope (machine pitch) on the in-cab monitor. Use relative value readout to alter grades relative to existing or reference grades.
- **Slope Control** lets operators automatically maintain blade position without using external lasers or GNSS, to hold grade with less effort, corrections, and adjustments. Laser option helps make Slope Control even more productive.
- The first CTL to feature fully integrated 3D-grade-control technology, the **333G SmartGrade** includes our operator-friendly DozerMode control system. Pushing a button on the sealed-switch module switches to the EH control pattern to enable intuitive crawler operation. Deere-designed and -built six-way SG96 Dozer Blade is tough enough to cut grade but can also smoothly spread or precisely fine-grade materials.

Packed for productivity

Low center of gravity, 35-degree bucket rollback, optional ride control, and optional hydraulic self-leveling help keep forks loaded and buckets full. Add capacity with up to three sets of rear counterweights.

Balanced by design

Longer track frames and optimized roller spacing improve balance and stability, to enhance agility and operator comfort compared to previous models.

Room with a view

Large cab entryway with swing-out door, generous foot- and legroom, sealing and pressurization to minimize dust and noise, and deluxe vinyl suspension seat optimize operator comfort. Easy-to-read LCD monitor reveals a wealth of vital operating info and advanced diagnostics.

Seeing is believing

Clear sightlines to the cutting edge and bucket corners, above and below the lift arms, and the jobsite ahead and behind instill confidence in close quarters. Optional LED side lighting and rearview camera further enhance visibility.

Within easy reach

Tilt the hood up for convenient ground-level access to the dipstick, filters, and fuel and fluid fills. Neat freaks and rental yards can appreciate the convenient cab-footwell access that helps speed cleaning.

Choose to connect

Equip your CTL with your choice of over 100 available John Deere attachments to expand the flexibility of your operation. Increased auxiliary hydraulic flow and power compared to previous models boosts attachment performance.

**SWITCHING ATTACHMENTS
ENABLES VERSATILITY IN
ANY WEATHER OR SEASON**

Safety first

Standard personal-protection features include in-cab-activated boom lock and triple-interlock system that detects the presence of the operator to help keep harm's way at bay.

Remote diagnostics and support

To maximize uptime and lower costs, JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. JDLink also enables John Deere Connected Support™. Dealers use Expert Alerts based on data from thousands of connected machines to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.*
